TODAY'S CAR SCORE¹	0.2
--------------------------------------	------------

¹The COVID Area Risk (CAR) Score will be recalculated once reports from all participating labs are up to date. The ideal long-term goal is to sustain a CAR Score of 2.5 or less, which has been shown to correlate with very low to zero COVID-related hospitalizations and deaths.

According to the [U.S. Centers for Disease Control and Prevention \(CDC\)](#), those due for their second dose of the vaccine may get their second dose up to four (4) days early. The CDC further states that if it is not feasible to adhere to the recommended interval and a delay in vaccination is unavoidable, the second dose of Pfizer-BioNTech and Moderna COVID-19 vaccines may be administered up to 6 weeks (42 days) after the first dose.
