DPHSS Guidance Memorandum 2021-28

RE: Additional Guidance Relative to Persons with a Documented Previous COVID-19 Infection

The purpose of this addendum is to provide additional guidance to individuals who were recently diagnosed and recovered from COVID-19 with documented evidence.

The Department of Public Health and Social Services is committed to providing an inclusive and supportive environment for all and recognizes that some individuals may not be tested for COVID-19 due to a documented previous infection of COVID-19. Therefore, individuals who have contracted and recovered from COVID-19 within the previous ninety (90) days and show no symptoms of infection may be eligible for exemption from weekly COVID-19 testing. Individuals seeking such exemption must present the following documents to their immediate supervisor.

Valid Documents Accepted:

1. Valid positive COVID-19 molecular or antigen test result collected between 10 to 90 days prior; OR,
2. Valid positive COVID-19 molecular or antigen test result collected within 10 days and a subsequent clearance from a physician, clinic, or a health department.

At the expiration of the 90 day period following an individual's positive COVID-19 test, the individual will be required to test for COVID-19 for diagnostic and screen testing purposes. If you develop new symptoms, please talk to your healthcare provider.

This policy is implemented as a public health measure to protect the health of Guam community. Please join us in keeping our people and community healthy and safe.
