

**Joint Information Center – JIC Release No. 1004**

**March 28, 2022, 4:55 p.m. (ChST)**

**Two COVID-19-related Fatalities Reported;  
Cumulative COVID-19 Test Results: 42 New Cases, 13 Hospitalized;  
Changes Made to COVID-19 Vaccination and Testing Schedule**

**Two COVID-19-related Fatalities Reported**

Today, the Joint Information Center was notified of two COVID-19-related fatalities:

- The 341st COVID-19-related fatality was pronounced dead on arrival at the Guam Memorial Hospital (GMH) on March 25, 2022. The patient was a 78-year-old female, unvaccinated, who tested positive on March 26.
- The 342nd COVID-19-related fatality was pronounced dead on arrival at GMH on March 28, 2022. The patient was a 66-year-old male, fully vaccinated with a booster, who tested positive on March 28.

“Jeff, Josh, and I pray for their family and friends during this most difficult time, that they find peace and comfort as we continue to battle this pandemic together as a community,” said Governor Lou Leon Guerrero.

**Cumulative COVID-19 Test Results: 42 New Cases Reported March 26 – 28**

From March 26–28, 2022, the Department of Public Health and Social Services (DPHSS) reported **42** new cases of COVID-19. **13** of the cases reported today is through the Department of Defense. **The 42 new cases does not include cases previously reported in [JIC Release No. 1002](#) and [1003](#).** The breakdown of the cumulative results is below:

- March 28: **11** of **221** test positive for COVID-19
- March 27: **16** of **319** test positive for COVID-19 ([2 cases previously reported](#)).
- March 26: **45** of **802** test positive for COVID-19 ([28 cases previously reported](#)).

To date, there have been a total of **47,122** officially reported cases, **342** deaths, **888** cases in active isolation, and **45,892** not in active isolation.

Guam’s COVID-19 Community Level is **MODERATE** based on the latest available data of new COVID admissions per 100,000 population (7-day total), percent of staffed inpatient beds occupied by COVID-19 patients, and new cases per 100,000 population (7-day total). Guam’s Community Level utilizes the same [methodology as the U.S. Centers for Disease Control and Prevention \(CDC\)’s Community Levels](#).

### 13 Hospitalized for COVID-19

CENSUS as of 4 p.m.	GMH	GRMC	USNH	TOTAL
COVID-19 Admission	5	7	1	13
Pediatric Admissions	1	-	-	1
ICU	0	0	-	0
Ventilator	0	0	-	0

VACCINATION STATUS	VACCINATED	UNVACCINATED	INELIGIBLE (0-4 years old)
Hospitalized	6	7	0
Total in Population*	135,899	5,706	12,229
Rate per 100,000 Population	4	123	0

**SPECIAL NOTE:** Based on today's data, if we were to compare two (2) hypothetical populations of 100,000 people each, vaccinated versus unvaccinated, there would be 4 vaccinated people hospitalized for COVID-19 compared to 123 unvaccinated people hospitalized for COVID-19. The risk of being hospitalized for COVID-19 is about 31 times higher for the unvaccinated as compared to the vaccinated. \*Estimated population is based on DPHSS Immunization Program analysis of 2020 Census data. Updates are expected pending further Census 2020 data breakdown.
