

Joint Information Center – JIC Release No. 1059
May 27, 2022, 5:50 p.m. (ChST)

**363rd COVID-19-related Fatality Reported;
 COVID-19 Test Results: 61 New Cases, Six Hospitalized**

363rd COVID-19-related Fatality Reported

Today, the Joint Information Center was notified that Guam’s 363rd COVID-19-related fatality was pronounced dead on arrival at the Guam Regional Medical City on May 7, 2022. The patient was a 58-year-old male, unvaccinated, with underlying health conditions, who tested positive on May 7.

“Jeff, Josh, and I offer our sincerest condolences to his family,” said Governor Lou Leon Guerrero. “Today’s news of another member of our community lost is a harsh reminder that COVID-19 remains ever present. Those who suffer from cold or flu-like symptoms, especially individuals with underlying health conditions, are reminded not to wait until it’s too late. Check in with your doctor and get tested if you have symptoms.”

COVID-19 Test Results: 61 New Cases Reported

Today, DPHSS reported **61** new cases of COVID-19 from **1,466** specimens analyzed May 26, 2022. **35** of the cases reported today are through the Department of Defense. To date, there have been a total of **48,968** officially reported cases, **363** deaths, **300** cases in active isolation, and **48,305** not in active isolation.

Six Hospitalized for COVID-19

CENSUS as of 5 p.m.	GMH	GRMC	USNH	TOTAL
COVID-19 Admission	3	3	0	6
Pediatric Admissions	0	-	-	0
ICU	1	0	0	1
Ventilator	1	0	0	1

VACCINATION STATUS	VACCINATED	UNVACCINATED	INELIGIBLE (0-4 years old)
Hospitalized	5	1	0
Total in Population*	136,665	4,942	12,229
Rate per 100,000 Population	4	20	0

*SPECIAL NOTE: Based on today’s data, if we were to compare two (2) hypothetical populations of 100,000 people each, vaccinated versus unvaccinated, there would be 4 vaccinated people hospitalized for COVID-19 compared to 20 unvaccinated people hospitalized for COVID-19. The risk of being hospitalized for COVID-19 is about 5 times higher for the unvaccinated as compared to the vaccinated. *Estimated population is based on DPHSS Immunization Program analysis of 2020 Census data. Updates are expected pending further Census 2020 data breakdown.*

Second COVID-19 Booster Doses Available

Second doses of the COVID-19 booster are available to individuals ages 12 years and older who are moderately or severely immunocompromised. Eligible individuals may receive a second

booster dose using an mRNA (Pfizer-BioNTech or Moderna) COVID-19 vaccine at least 4 months after the first booster dose.

Adults between the ages of 18 and 49 who are not moderately or severely immunocompromised and who received Janssen COVID-19 Vaccine as both their primary series dose and booster dose may receive a second booster dose using an mRNA COVID-19 vaccine at least 4 months after the Janssen booster dose. Adults ages 50 years and older could benefit from a second mRNA booster dose as they are at increased risk for severe COVID-19. Adults 50 years and older may receive a second booster dose, if it has been at least 4 months after the first booster dose.
