

Joint Information Center - JIC Release No. 586
February 28, 2021, 12:45 p.m. (ChST)

**Results: One of 111 Tests Positive for COVID-19;
 Vaccination Clinics to Resume Once Vaccine Supply is Restored**

Results: One New Case of COVID-19

One (1) new case of COVID-19 was identified out of 111 tests performed on Saturday, February 27.

To date, there have been a total of **7,736** officially reported cases of COVID-19 with **131** deaths, **41** cases in active isolation, and **7,564** not in active isolation.

TODAY'S CAR SCORE¹ 0.2

¹The COVID Area Risk (CAR) Score will be recalculated once reports from all participating labs are up to date. The CAR Score accounts for the incidence of new cases, how well current testing identifies these cases, and the rate of spread. The ideal long-term goal is to sustain a CAR Score of 2.5 or less, which has been shown to correlate with very low to zero COVID-related hospitalizations and deaths.

The following tables provide COVID-19 test results reported to the JIC on Sunday, February 28, and reflects results from Saturday, February 27:

COVID-19 CASE COUNT	TOTAL	NEW CASES REPORTED TODAY	PAST 7 DAYS
COVID-19 CASES:	7,736	1	N/A
CONFIRMED CASES:	7,527	1	N/A
PROBABLE CASES:	209	0	0

COVID HOSPITAL CENSUS	Guam Memorial Hospital	Guam Regional Medical City	U.S. Naval Hospital	TOTAL
COVID ADMISSION	4	0	0	4
IN ICU	1	0	0	1
ON VENTILATOR	1	0	0	1

The following provides preliminary COVID-19 vaccinations reported to the JIC on Sunday, February 28, for vaccinations administered from December 17 to February 26:

Vaccine Maker	Total Doses Administered	1st Doses Administered	2nd Doses Administered	Individuals Fully Immunized
Pfizer-BioNTech	29,721	17,165	12,556*	12,556
Moderna	22,306	14,630**	7,676***	7,676
TOTALS:	52,027[^]	31,795	20,232	20,232

*Administering second doses of Pfizer-BioNTech COVID-19 vaccinations began on January 4, 2021.

**Administering first doses of Moderna COVID-19 vaccinations began on January 8, 2021.

***Administering second doses of Moderna COVID-19 vaccinations began on January 29, 2021.

Total Doses Administered	Total Doses Allotted	% Administered	Doses Remaining
--------------------------	----------------------	----------------	-----------------

52,027[^]	51,300^{^^}	101.42%	(-727)
---------------------------	----------------------------	----------------	---------------

[^]As of February 27, 2021. Total doses administered and allotted doses differ as vaccinators were able to draw additional doses per vial. Additionally, the [U.S. Food and Drug Administration's February 25, 2021 revision](#) of their Fact Sheet relative to the Pfizer-BioNTech Emergency Use Authorization now states "After dilution, one vial contains 6 doses of 0.3 mL. Vial labels and cartons may state that after dilution, a vial contains 5 doses of 0.3 mL. The information in this [Fact Sheet](#) regarding the number of doses per vial after dilution supersedes the number of doses stated on vial labels and cartons." | ^{^^}Reflects the previous allocation total of 43,500 and last received allocation of 7,800 on February 7, 2021

Vaccination Clinics to Resume Once Vaccine Supply is Restored

As the island continues toward achieving herd immunity, global demand for the vaccine will affect supply levels, which may affect vaccination clinics. As reported in JIC Release No. 584, on Friday, the Department of Public Health and Social Services' (DPHSS) Immunization Program placed its order for 35,260 COVID-19 vaccines for March, with shipment expected the first week of March.

Once Guam's vaccine supply is restored, mass vaccination clinics will resume, and additional vaccination clinics will prioritize those due for the second dose to ensure those individuals complete their vaccination series. Mass vaccination clinics are anticipated to be scheduled as early as March 8, 2021. More information will become available through the Joint Information Center once it becomes available.

Short-term deferral of the second dose will not decrease the effectiveness of the COVID-19 vaccine, nor will affected individuals be required to restart the vaccination series. According to the [U.S. Centers for Disease Control and Prevention \(CDC\)](#), the second dose should be administered as close to the recommended interval as possible. The CDC further states that if it is not feasible to adhere to the recommended interval and a delay in vaccination is unavoidable, the second dose of Pfizer-BioNTech and Moderna COVID-19 vaccines may be administered up to 6 weeks (42 days) after the first dose.

GBHWC Crisis Hotline

The Guam Behavioral Health and Wellness Center (GBHWC) has a Crisis Hotline available 24/7 at (671) 647-8833/4. For those feeling anxious, stressed, overwhelmed, or are needing to talk to someone, GBHWC has experienced providers available and ready to assist the community with any heightened stress and anxiety experienced as a result of COVID-19.

For the latest information on COVID-19, visit dphss.guam.gov or guamrecovery.com. For inquiries on COVID-19, contact 311 through a local number, or call the Joint Information Center at (671) 478-0208/09/10.
