Results: Three New Cases of COVID-19

Three (3) new cases of COVID-19 were identified out of **399** tests performed on Wednesday, March 31. To date, there have been a total of **7,810** officially reported cases of COVID-19 with **134** deaths, **27** cases in active isolation, and **7,649** not in active isolation. **Three (3)** cases reported recent travel history and were identified in quarantine.

TODAY'S CAR SCORE¹

0.2

¹The COVID Area Risk (CAR) Score accounts for the incidence of new cases, how well current testing identifies these cases, and the rate of spread. The ideal long-term goal is to sustain a CAR Score of 2.5 or less, which has been shown to correlate with very low to zero COVID-related hospitalizations and deaths.

The following tables provide COVID-19 test results from Wednesday, March 31:
