**320th COVID-19-related Fatality Reported;  
COVID-19 Test Results: 349 New Cases, 42 Hospitalized;  
No Symptoms Needed to Test for COVID-19**

**320th COVID-19-related Fatality Reported**

Today, the Joint Information Center was notified that Guam's 320th COVID-19-related fatality occurred at the U.S. Naval Hospital (USNH) Guam on February 23, 2022. The patient was an 82-year-old male, unvaccinated, with underlying health conditions, who tested positive on February 9.

"To his family and those who loved him, Jeff, Josh, and I offer our deepest sympathies and condolences," said Governor Lou Leon Guerrero. "Our elderly and our sick remain vulnerable to this virus. Now, more than ever, we must pay extra attention to our loved ones and their health and wellness. Get tested and know your status if you are feeling sick or you feel you may have been exposed. The sooner you get tested, the earlier you can take action and preserve life."

**DON'T WAIT UNTIL IT'S TOO LATE.**

Look for emergency warning signs for COVID-19. Call 911 if you have trouble breathing, persistent pain or pressure in the chest, new confusion, inability to wake or stay awake, or bluish lips or face. Individuals who are sick are advised to:

- Stay home, except to seek medical care. Call ahead before visiting the clinic/doctor.
- Monitor for symptoms of COVID-19 including fever, cough, and shortness of breath, fatigue, body aches, headaches, loss of taste or smell, sore throat, congestion, nausea and/or diarrhea.
- Get tested if you have symptoms of COVID-19. While waiting for test results, you should stay away from others, including staying apart from those living in your household.

**Older Adults, People with Serious Chronic Medical Conditions are Most at Risk for Serious Complications and Death Due to SARS-CoV-2/COVID-19**

Serious chronic medical conditions include:

- Heart disease
- Diabetes
- Lung disease
- Obesity
- Immunocompromised conditions (e.g. cancer, lupus)
- Chronic renal disease
- Neurologic or neurodevelopmental condition
- Current or former smoking
- Chronic liver disease

**42 Hospitalized for COVID-19**

CENSUS as of 4 p.m.	GMH	GRMC	USNH	TOTAL
COVID-19 Admission	27	15	0	42
Pediatric Admissions	1	-	-	1

ICU	4	2	0	6
Ventilator	2	0	0	2

VACCINATION STATUS	VACCINATED	UNVACCINATED	INELIGIBLE (0-4 years old)
Hospitalized	27	15	0
Total in Population*	134,625	6,982	12,229
Rate per 100,000 Population	20	215	0

**SPECIAL NOTE:** Based on today's data, if we were to compare two (2) hypothetical populations of 100,000 people each, vaccinated versus unvaccinated, there would be 20 vaccinated people hospitalized for COVID-19 compared to 215 unvaccinated people hospitalized for COVID-19. The risk of being hospitalized for COVID-19 is about 11 times higher for the unvaccinated as compared to the vaccinated. \*Estimated population is based on DPHSS Immunization Program analysis of 2020 Census data. Updates are expected pending further Census 2020 data breakdown.

### COVID-19 Test Results: 349 New Cases of COVID-19

Today, the Department of Public Health and Social Services (DPHSS) reported **349** new cases of COVID-19 from **1,124** specimens analyzed on February 22, 2022. **99** of the cases reported today are through the Department of Defense. To date, there have been a total of **43,560** officially reported cases, **320** deaths, **3,237** cases in active isolation, and **40,003** not in active isolation.

### No Symptoms Needed to Test for COVID-19
