### For Immediate Release

August 24, 2021, 12:55 p.m. (ChST)

### Flash Flood Warning in Effect; Avoid Driving through Flooded Roads

The National Weather Service (NWS) Guam Weather Forecast Office has issued a **flash flood warning** for Guam, in effect until 2:30 p.m. Flash flooding is ongoing or expected to begin shortly. Thunderstorms are producing heavy rain across the area. Between 1 and 2 inches of rain have already fallen. Additional rainfall amounts of 1 to 3 inches are possible.

Expected impacts include flash flooding of small creeks and streams, urban areas, highways, streets and underpasses as well as other poor drainage and low-lying areas. Some locations that will experience flash flooding include Mangilao, Chalan Pago-Ordot, Yona, Agana Heights, Talofoto, Inarajan, Asan, Piti, Santa Rita, and Umatac.

Residents and visitors are advised to take the following precautionary actions:

- Report road hazards or flooding to local emergency services.
- If driving, be alert for low visibilities and slippery roads in heavy rain;
- Slow down where water is ponding on the road;
- Turn Around, Don't Drown. Avoid walking or driving through flood waters. Just 6 inches of moving water can knock you down, and 2 feet of water can sweep your vehicle away;
- Avoid camping, parking, or hiking along streams, rivers, and creeks during heavy rainfall. These areas can flood quickly and with little warning;
- Visit <https://www.ready.gov/floods> to learn more.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to practice extreme caution while traveling in rainy conditions, driving below the speed limit and allowing enough braking distance between vehicles.
