### **Flood Advisory in Effect; Practice Caution in Heavy Rain**

The National Weather Service (NWS) Guam Weather Forecast Office issued a **flood advisory**, in effect for southern Guam, until 3:00pm this afternoon. Urban and small stream flooding caused by excessive rainfall is expected. Additional rainfall amounts of 2 to 4 inches are expected over the area. This additional rain will result in minor flooding.

Some locations that will experience flooding include Inarajan, Talofoto, Agat, Asan, Merizo, Piti, Santa Rita and Umatac.

Residents and visitors are advised to take the following precautionary actions;

- Turn around, don't drown when encountering flooded roads. Most flood deaths occur in vehicles.
- Be aware of your surroundings and do not drive on flooded roads.
- In hilly terrain there are hundreds of low water crossings which are potentially dangerous in heavy rain. Do not attempt to cross flooded roads. Find an alternate route.
- Flooding is occurring or is imminent. It is important to know where you are relative to streams, rivers, or creeks which can become killers in heavy rains. Hikers especially should avoid streams and creeks.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) advise the community to practice caution while traveling in rainy conditions, driving below the speed limit and allowing enough braking distance between vehicles.
