Flood Advisory in Effect; Practice Caution on the Roadways

The National Weather Service (NWS) Guam Weather Forecast Office issued a **flood advisory** for Guam, in effect until 1 p.m. this afternoon. Urban and small stream flooding caused by excessive rainfall is occurring. Minor flooding in low-lying and poor drainage areas is expected. Rainfall amounts of 1 to 2 inches will be possible.

Some locations that will experience flooding include Chalan Pago-Ordot, Barrigada, Agana Heights, Mongmong-Toto-Maite, Sinajana, Asan, and Piti.

Residents and visitors are advised to take the following precautionary actions:

- If driving, be alert for low visibilities and slippery roads in heavy rain;
- Slow down where water is ponding on the road;
- Turn Around, Don't Drown. Avoid walking or driving through flood waters. Just 6 inches of moving water can knock you down, and 2 feet of water can sweep your vehicle away;
- Do not camp, park, or hike along streams, rivers, and creeks during heavy rainfall. These areas can flood quickly and with little warning.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) advise the community to practice caution while traveling in rainy conditions, driving below the speed limit and allowing enough braking distance between vehicles.
