Flood Advisory Issued for Guam; Practice Caution in Heavy Rain

The National Weather Service (NWS) Guam Weather Forecast Office has issued an **urban and small stream flood advisory** for poor drainage areas for Guam until 12:30 a.m.

An area of heavy rain and thunderstorms just south of Guam will move over the island and cause urban and small stream flooding in Guam. Between 1 and 2 inches of rain have already fallen. Additional rainfall amounts of 1 to 2 inches are expected over the area resulting in minor flooding.

Residents and visitors are advised to take the following precautionary actions:

- Avoid driving on flooded roads;
- If driving, be alert for low visibilities and slippery roads in heavy rain;
- Slow down where water is ponding on the road;
- Turn Around, Don't Drown. Avoid walking or driving through flood waters. Just 6 inches of moving water can knock you down, and 2 feet of water can sweep your vehicle away;
- Avoid camping, parking, or hiking along streams, rivers, and creeks during heavy rainfall. These areas can flood quickly and with little warning;
- Visit <https://www.ready.gov/floods> to learn more.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to practice extreme caution while traveling in rainy conditions, driving below the speed limit and allowing enough braking distance between vehicles.
