### For Immediate Release

October 15, 2025, 5:40 a.m. (ChST)

### Flood Warning in Effect for Guam; Landslide Reported in East Agana

The National Weather Service (NWS) Guam Weather Forecast Office issued a **flood warning**, in effect for Guam until 7:30 a.m. this morning.

An unsettled pattern caused by a passing tropical disturbance, Invest 96 W, is producing heavy showers and thunderstorms. Between 2 and 3 inches of rain has already fallen. Additional rainfall amounts of 1.5 to 2 inches are possible across Guam in the next 1 to 2 hours. Flash flooding is ongoing or expected to begin shortly.

The community is advised to take the following precautionary actions:

- If driving, be alert for low visibilities in heavy rain;
- Slow down where water is ponding on the road;
- Turn Around, Don't Drown. Avoid walking or driving through flood waters. Just 6 inches of moving water can knock you down, and 2 feet of water can sweep your vehicle away;
- Do not camp, park, or hike along streams and rivers. These areas can flood quickly and with little warning.

### Landslide in East Agana

There is a reported landslide in East Agana. The Guam Department of Public Works and Guam Police Department are on scene. All northbound lanes are closed, along with one southbound lane; one southbound lane remains open at this time. Motorists are advised to find an alternate route or, if travel through the area is necessary, practice extreme caution and heed the advice of emergency officials.

The Office of Homeland Security and the Office of Civil Defense (OHS-OCD) remind the community to practice caution while traveling in heavy rain, driving below the speed limit and allowing enough braking distance between vehicles.
