### For Immediate Release

February 7, 2025, 11 a.m. (ChST)

### **Hazardous Surf and Seas Remain; Inexperienced Swimmers Advised to Stay Out of the Water**

The National Weather Service (NWS) Guam Weather Forecast Office has the following advisories in effect:

A **high surf advisory** remains in effect for Guam, Rota, Tinian, and Saipan and has been extended to 6 a.m. Saturday. Large breaking waves of 9 to 11 feet are expected. Dangerous swimming and surfing conditions and localized beach erosion are expected. Inexperienced swimmers should remain out of the water due to dangerous surf conditions.

A **high risk of rip currents** remains in effect for north facing reefs of Guam, Rota, Tinian, and Saipan through late tonight. Rip currents can sweep even the best swimmers away from the shore into deeper water. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

A **small craft advisory** remains in effect for the coastal waters of Guam, Rota, Tinian and Saipan until 6 a.m. Saturday. Seas of 9 to 11 feet are expected. Conditions will be hazardous to small craft. Inexperienced mariners, especially those operating smaller vessels, should avoid boating in hazardous conditions.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid hazardous surf and dangerous rip currents, especially north facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
