### For Immediate Release

January 6, 2022, 5:50 p.m. (ChST)

### **Hazardous Surf and Seas Remain through Friday; Inexperienced Swimmers Reminded to Stay Out of the Water**

The National Weather Service (NWS) Guam Weather Forecast Office advised fresh to strong northeasterly winds and mixed north and northeast swell will keep surf elevated along north and east facing reefs through Friday afternoon. East swell will likely build Friday, possibly making surf hazardous along east facing reefs.

The following NWS advisories remain in effect:

A **high risk of rip currents** remains in effect for Guam, Rota, Tinian, and Saipan through Friday afternoon. Dangerous rip currents are expected along east facing reefs. Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous surf conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

A **small craft advisory** remains in effect for the coastal waters of Guam, Rota, Tinian, and Saipan until 6 p.m. Friday. East winds of 15 to 25 knots, with gusts up to 30 knots, and seas of 8 to 11 feet are expected. Inexperienced mariners, especially those operating smaller vessels, should avoid navigating in hazardous conditions.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid hazardous sea and surf, especially east facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
