### For Immediate Release

November 2, 2025, 8:50 a.m. (ChST)

### Heavy Rainfall Anticipated to Develop Around Midweek as Disturbance Approaches

The National Weather Service (NWS) Guam Weather Forecast Office continues to monitor Invest 99W, a weak circulation near 12N147E, southeast of Guam. It has been downgraded to sub-low by the Joint Typhoon Warning Center, reflecting a decreasing potential for this disturbance to become a significant tropical cyclone. The NWS notes computer models still point to a disturbance to eventually take shape to the south of Guam by midweek, that is anticipated to lift north or northwest, bringing increasing showers and winds to the Marianas as early as Tuesday.

Heavy showers and near gale-force (39 mph) winds remain possible with the peak anticipated around Wednesday or Thursday. There is potential for Guam and the CNMI to see rainfall amounts of 3 to 7 inches between Tuesday and Thursday night. This rainfall could result in minor flooding across the islands, with flash flooding possible in areas of heavier rainfall, especially over Guam.

Residents and visitors are advised to take the following precautionary actions:

- Those living in flood-prone areas should take action; clear drainage areas and unblock storm drains to minimize flooding;
- Stay up to date with the latest weather information;
- When driving in heavy rain, be alert for low visibilities and slippery roads;
- Slow down where water is ponding on the road;
- Turn Around, Don't Drown. Avoid walking or driving through flood waters. Just 6 inches of moving water can knock you down, and 2 feet of water can sweep your vehicle away;
- Do not camp, park, or hike along streams and rivers. These areas can flood quickly and with little warning;
- Be alert for possible landslides in areas of steep terrain. Be alert for hillsides or slopes that appear saturated or unstable. Look for warning signs such as cracks in the ground, leaning trees, or sudden changes in water flow. Report any signs of potential landslides to local authorities immediately.

The weather forecast for the week includes:

- Today: Breezy. Partly sunny with isolated showers. East winds 15 to 20 mph. Highs near 87. Chance of showers 20 percent.
- Tonight: Mostly cloudy with scattered showers and isolated thunderstorms. East winds 10 to 15 mph. Lows around 78. Chance of showers 50 percent.
- Monday: Breezy. Partly sunny with scattered showers. East winds 20 to 25 mph. Highs around 86. Chance of showers 40 percent.
- Monday Night and Tuesday: Breezy. Mostly cloudy. Scattered showers. East winds 15 to 25 mph. Lows around 78. Highs near 85. Chance of showers 40 percent.
- Tuesday Night and Wednesday: Breezy. Mostly cloudy. A 40 percent chance of showers and a slight chance of thunderstorms. Lows in the upper 70s.

- Wednesday Night: Mostly cloudy with a 50 percent chance of showers and a slight chance of thunderstorms. Lows in the upper 70s.
- Thursday and Thursday Night: Cloudy with a 50 percent chance of showers and a slight chance of thunderstorms. Highs in the mid 80s. Lows in the upper 70s.

The Office of Homeland Security and the Office of Civil Defense (OHS-OCD) remind the community to stay alert for additional advisories in the coming days.
