High Risk of Rip Currents and Small Craft Advisory Remain in Effect; Inexperienced Swimmers Advised to Stay Out of the Water

The National Weather Service (NWS) Guam Weather Forecast Office advised a **high risk of rip currents** remains in effect for east facing reefs of Guam, Rota, Tinian, and Saipan through Monday night. Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

Inexperienced swimmers should remain out of the water due to dangerous conditions.

A **small craft advisory** remains in effect until 6 a.m. Tuesday. East winds of 15 to 25 knots, with isolated gusts up to 30 knots and seas of 8 to 11 feet are expected. Inexperienced mariners, especially those operating smaller vessels, should avoid navigating in hazardous conditions.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid hazardous seas and dangerous rip currents, especially east facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
