High Risk of Rip Currents and Small Craft Advisory Remains in Effect

The National Weather Service (NWS) Guam Weather Forecast Office maintains a **high risk of rip currents**, in effect for Guam, Rota, Tinian, and Saipan through Wednesday afternoon for east facing reefs. Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

A **small craft advisory** remains in effect for the coastal waters of Guam, Rota, Tinian, and Saipan until 6 p.m. Tuesday. East winds of 15 to 20 knots, with gusts to 30 knots, and seas of 7 to 9 feet are expected. Inexperienced mariners, especially those operating smaller vessels, should avoid navigating in hazardous conditions.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid hazardous seas.
