High Risk of Rip Currents Expected through Wednesday

The National Weather Service (NWS) Guam Weather Forecast Office issued a **high risk of rip currents**, in effect for Guam, Rota, Tinian, and Saipan through Wednesday afternoon for east facing reefs of the Marianas. Rip currents can sweep even the best swimmers away from the shore into deeper water. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

Inexperienced swimmers should remain out of the water due to dangerous conditions.
