### For Immediate Release

November 11, 2023, 9 a.m. (ChST)

### High Risk of Rip Currents in Effect

The National Weather Service (NWS) Guam Weather Forecast Office issued a **high risk of rip currents**, in effect for Guam, Rota, Tinian, and Saipan through Monday afternoon for east facing reefs.

Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.
