High Risk of Rip Currents through Sunday; Inexperienced Swimmers Advised to Stay Out of the Water

The National Weather Service (NWS) Guam Weather Forecast Office advised a **high risk of rip currents** is in effect for Guam, Rota, Tinian, and Saipan through Sunday afternoon. Dangerous rip currents are expected for east facing reefs of the Marianas.

Inexperienced swimmers should remain out of the water due to dangerous rip currents.

Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid dangerous rip currents, especially east facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
