### For Immediate Release

November 4, 2022, 12 p.m. (ChST)

### **High Surf Advisory and High Risk of Rip Currents in Effect; Inexperienced Swimmers Advised to Stay Out of the Water**

The National Weather Service (NWS) Guam Weather Forecast Office issued a **high surf advisory** for Guam, Rota, Tinian, and Saipan, in effect until 6 a.m. Sunday. Large breaking waves of 9 to 11 feet are expected for north facing reefs of the Marianas. Dangerous swimming conditions and surfing conditions and localized beach erosion are expected. Inexperienced swimmers should remain out of the water due to dangerous surf conditions.

A **high risk of rip currents** is in effect for Guam, Rota, Tinian, and Saipan through Sunday morning. Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid hazardous surf and dangerous rip currents, especially north facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
