Flood Watch in effect through late Thursday night

The National Weather Service (NWS), Weather Forecast Office Guam issued a **flood watch**, in effect for Guam, Rota, Tinian, and Saipan, through late Thursday night.

Flash flooding caused by excessive rainfall continues to be possible.

Excessive runoff may result in flooding of low-lying and flood-prone locations. Flooding may occur in poor drainage and urban areas.

Invest area 95W is still southeast of Guam. As it travels over the Marianas and afterward as a monsoon surge sets up...copious rainfall will add up and saturate the soils, then begin to flood and run off.
